***Allowable Subject Matter***

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance:

The declaration of Gregory James, the first named inventor of the instant application, as well as the accompanying declaration of David Wainwright, establishes a date of invention of the subject matter claimed in the present application that is prior to the September 28, 2000 filing date of the McElroy patent. Therefore, the McElroy patent is not prior art, and the 35 USC 102(a) rejection over McElroy is withdrawn.

The 35 USC 112 second paragraph rejection of claims 1-12 is withdrawn in view of applicants' amendments and remarks filed 05 January 2004. The term "mean life expectancy" used in the instant claims is understood to denote "mean time to failure" (MTTF) as the term is ordinary understood in the reliability sciences. See, for example, [www.efunda.com/math/reliability/reliability](http://www.efunda.com/math/reliability/reliability) for a conventional definition of the term.

The prior art fails to disclose a method of operating a fuel cell system wherein, during the life of the fuel cell a modest number of fluid flow direction reversals, for instance, less than about 10, are carried out.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
